BDCC 19/20
Worksheet #2
Software engineering for scientific big data analysis
April 27th, 2020

Based on the following paper:

- Björn A. Grüning, Samuel Lampa, Marc Vaudel, Daniel Blankenberg, **Software engineering for scientific big data analysis**

Comment on the 10 guidelines presented by the authors highlighting the following points:

- Criticize each one of the 10 points
- According to you opinion what is the most important point of the presented guideline?
- Is it practically possible to achieve all the points?
- If you had to choose a subset of these 10 points, which ones would you choose and why?
