

Notas gerais para participação no curso de Computação Grid (21 de Fevereiro de 2013)

No que se refere à utilização de infraestruturas de grid, nas aulas práticas iremos ter acesso à infraestrutura de treinamento GILDA (<http://gilda.ct.infn.it/>), que utiliza o middleware gLite (<http://glite.cern.ch/>). Este middleware requer que cada um tenha um certificado, baseado em PKI (Public Key Infrastructure). Portanto, segue abaixo uma série de ações a serem tomadas para obtenção de um certificado e acesso à infraestrutura GILDA.

Obs1: Para obter o certificado, precisa utilizar o mozilla-firefox ou o Internet Explorer. Nenhum outro browser vai funcionar!

Obs2: O processo de obtenção do certificado tem duas fases: (1) solicitação e (2) obtenção. Certifique-se de que utiliza a MESMA máquina e o MESMO browser nas duas fases.

Passos para obtenção do certificado:

1. Entrar em <http://gilda.ct.infn.it/> e selecionar a “tab” “Certification Authority”

The screenshot shows the GILDA website interface. At the top, there are logos for INFN GRID, GILDA (Grid Infn Laboratory for Dissemination Activities), and EPIKH. Below the logos is a navigation menu with buttons for Home, Infrastructure, Certification Authority, Virtual Organization, AUP, Grid Demonstrator, Grid Tutor, Monitors, and Contacts. A red arrow points to the 'Certification Authority' button. Below the navigation menu, there is a sidebar with a list of links: News, List of Tutorials, Request a Tutorial, Services, Instructions for Users, Instructions for Sites, Training Material, GILDA Forge, Grid UI, Support System, Projects using GILDA, and Sponsors. The main content area features a news item dated 7th of June 2011, stating that the GILDA portal has been re-engineered using the Liferay portlet container. Below the news item, the title 'GILDA (Grid Infn Laboratory for Dissemination Activities)' is displayed, followed by a description of the laboratory and a list of its elements: GILDA Testbed, Grid Demonstrator, GILDA Certification Authority, GILDA Virtual Organization, Grid Tutor, GILDA P-GRADE Portal, and GILDA User Interface.

7th of June 2011: The GILDA portal, including its Training Material Repository, has been completely re-engineered using the Liferay portlet container as development framework. This is the first step towards the adoption of the Science Gateway paradigm for training and dissemination.

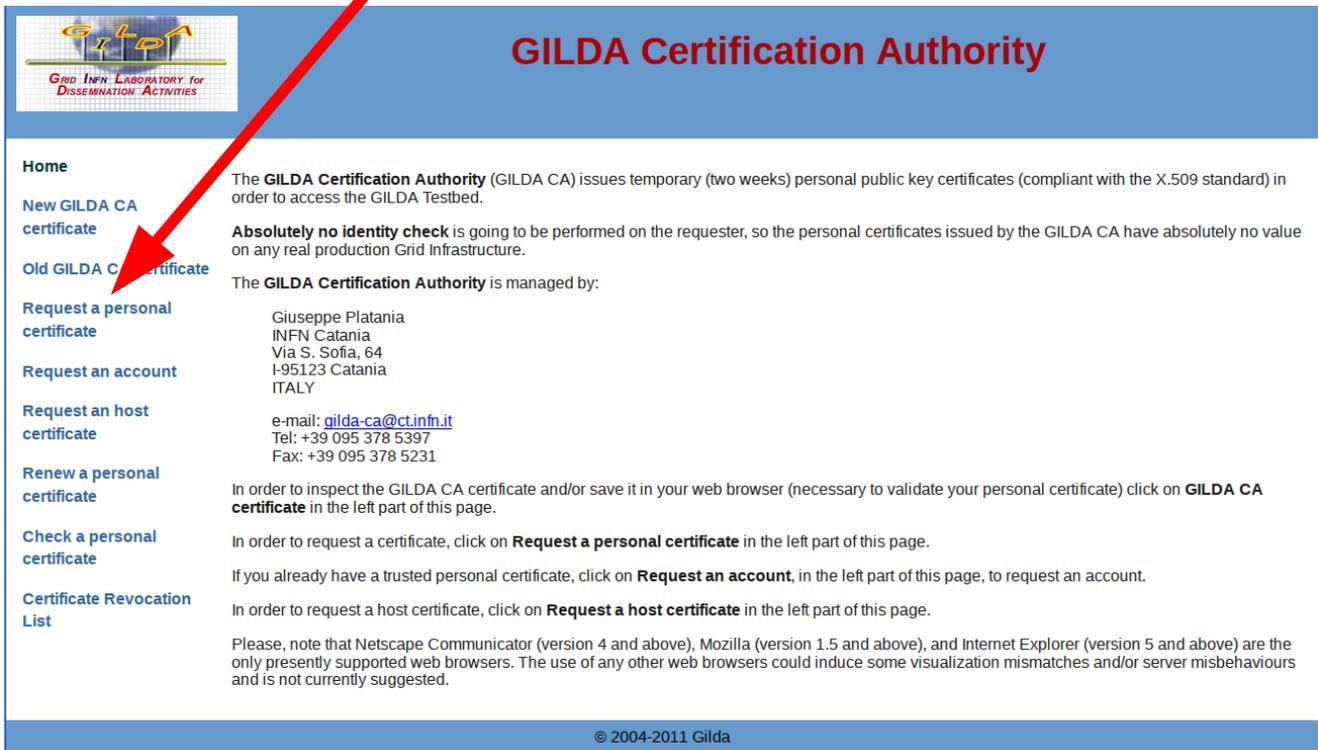

GILDA (Grid Infn Laboratory for Dissemination Activities)

is a virtual laboratory to demonstrate/disseminate the strong capabilities of grid computing.

GILDA consists of the following elements:

- [the GILDA Testbed](#): a series of sites and services (Workload Management Systems, Information Indexes, Data and Metadata Catalogues, Monitoring tools, Computing Elements, and Storage Elements) spread all over Italy and the rest of the world on which the latest version of the [INFN Grid](#) middleware (fully compatible with [gLite](#)) is installed;
- [the Grid Demonstrator](#): a customized version of the full [GENIUS web portal](#), jointly developed by INFN and [NICE](#), from where **everybody** can submit a pre-defined set of applications to the GILDA Testbed;
- [the GILDA Certification Authority](#): a fully functional Certification Authority which issues 14-days X.509 certificates to everybody wanting to experience grid computing on the GILDA Testbed;
- [the GILDA Virtual Organization](#): a Virtual Organization gathering all people wanting to experience grid computing on the GILDA Testbed; the GILDA Virtual Organization is based on the Virtual Organization Membership Service (VOMS) developed by INFN;
- [the Grid Tutor](#): based on a full version of the [GENIUS web portal](#), to be used only during [grid tutorials](#);
- [the GILDA P-GRADE Portal](#): a Grid workflow developer and executor environment based on the latest release of the [P-GRADE Grid Portal](#) provided by [MTA SZTAKI](#);
- [the GILDA User Interface](#): a gLite User Interface server accessible via SSH from within the web browser;

2. Selezione "Request a Personal Certificate"

GILDA Certification Authority

Home

- [New GILDA CA certificate](#)
- [Old GILDA CA certificate](#)
- [Request a personal certificate](#)
- [Request an account](#)
- [Request an host certificate](#)
- [Renew a personal certificate](#)
- [Check a personal certificate](#)
- [Certificate Revocation List](#)

The **GILDA Certification Authority** (GILDA CA) issues temporary (two weeks) personal public key certificates (compliant with the X.509 standard) in order to access the GILDA Testbed.

Absolutely no identity check is going to be performed on the requester, so the personal certificates issued by the GILDA CA have absolutely no value on any real production Grid Infrastructure.

The **GILDA Certification Authority** is managed by:

Giuseppe Platania
INFN Catania
Via S. Sofia, 64
I-95123 Catania
ITALY

e-mail: gilda-ca@ct.infn.it
Tel: +39 095 378 5397
Fax: +39 095 378 5231

In order to inspect the GILDA CA certificate and/or save it in your web browser (necessary to validate your personal certificate) click on **GILDA CA certificate** in the left part of this page.

In order to request a certificate, click on **Request a personal certificate** in the left part of this page.

If you already have a trusted personal certificate, click on **Request an account**, in the left part of this page, to request an account.

In order to request a host certificate, click on **Request a host certificate** in the left part of this page.

Please, note that Netscape Communicator (version 4 and above), Mozilla (version 1.5 and above), and Internet Explorer (version 5 and above) are the only presently supported web browsers. The use of any other web browsers could induce some visualization mismatches and/or server misbehaviours and is not currently suggested.

3. Preencha o formulário

Antes de preencher o formulário certifique-se de que instalou o certificado da própria Autoridade de Certificação GILDA no seu browser. Isto é feito apenas clicando no link “download the GILDA certificate”

Agora sim, preencha o formulário

Institute/University/Company: Universidade do Porto

First and Last name: **não utilize caracteres acentuados!!!**

Preencha o campo E-mail, pois este vai ser utilizado para lhe enviar as informações para obtenção do certificado

Selecione Medium Grade, mesmo que o default seja High Grade!

Clique em “Submit the request”

Certificate Revocation List

Request a GILDA personal certificate

WE SUPPORT ONLY FIREFOX OR INTERNET EXPLORER BROWSER

If you did not do it already, please [download the GILDA CA certificate first](#). In order to correctly generate a request it is mandatory to fill **all** fields in the form below. Please, double check the correctness of the e-mail address that you are going to provide since **no verification** will be performed by the server. When the certificate will be signed by the GILDA CA manager you will be notified by e-mail with the instructions to download your GILDA CA personal certificate and access the GILDA Testbed.

Institute/University/Company:

First name and last name:

E-mail:

KeySize: High Grade

Submit the request Clear form

© 2004-2011 Gilda

4. Após a submissão da solicitação, aguarde pela mensagem no mesmo endereço eletrônico que preencheu no passo (3).

A mensagem terá o seguinte conteúdo:

Dear GILDA User,

you can download your GILDA Personal Certificate going, *with the same browser you used to submit the request*, from the URL:

<https://gilda-security.ct.infn.it/cgi-bin/gucert.pl?03E7>

Your certificate will be valid for 365 days and you will be notified in due time for renewal.

In order to use GILDA, you now have:

1) to explicitly accept the GILDA Use Policy:

<https://gilda.ct.infn.it/aup.php>

2) to register to the GILDA VO (usually, registration takes a working day):

<https://voms.ct.infn.it:8443/voms/gilda/StartRegistration.do>

3) to register to the GILDA Support System:

<http://gilda-support.ct.infn.it>

and use only this system to submit bugs and/or questions.

When steps 1)-3) are done you can go to the GILDA Grid Demonstrator at the URL:

<https://glite-demo.ct.infn.it>

If you prefer, you can also download a personal GILDA User Interface from the page:

<https://gilda.ct.infn.it/VirtualServices.html>

or use our GILDA User Interface requesting an account at

<https://gilda-security.ct.infn.it/CA/mgt/restricted/account.php>

Keep looking at the GILDA News:

<https://gilda.ct.infn.it/news.html>

to get fresh information about GILDA.

Best Regards

The GILDA CA Manager

--

GILDA Certification Authority

Tel: [+39 095 378 5501/5397](tel:+3909537855015397)

Fax: [+39 095 378 5231](tel:+390953785231)

Via S. Sofia, 64

No item (1) desta mensagem deve substituir o link: <https://gilda.ct.infn.it/aup.php> por <https://gilda.ct.infn.it/aup>

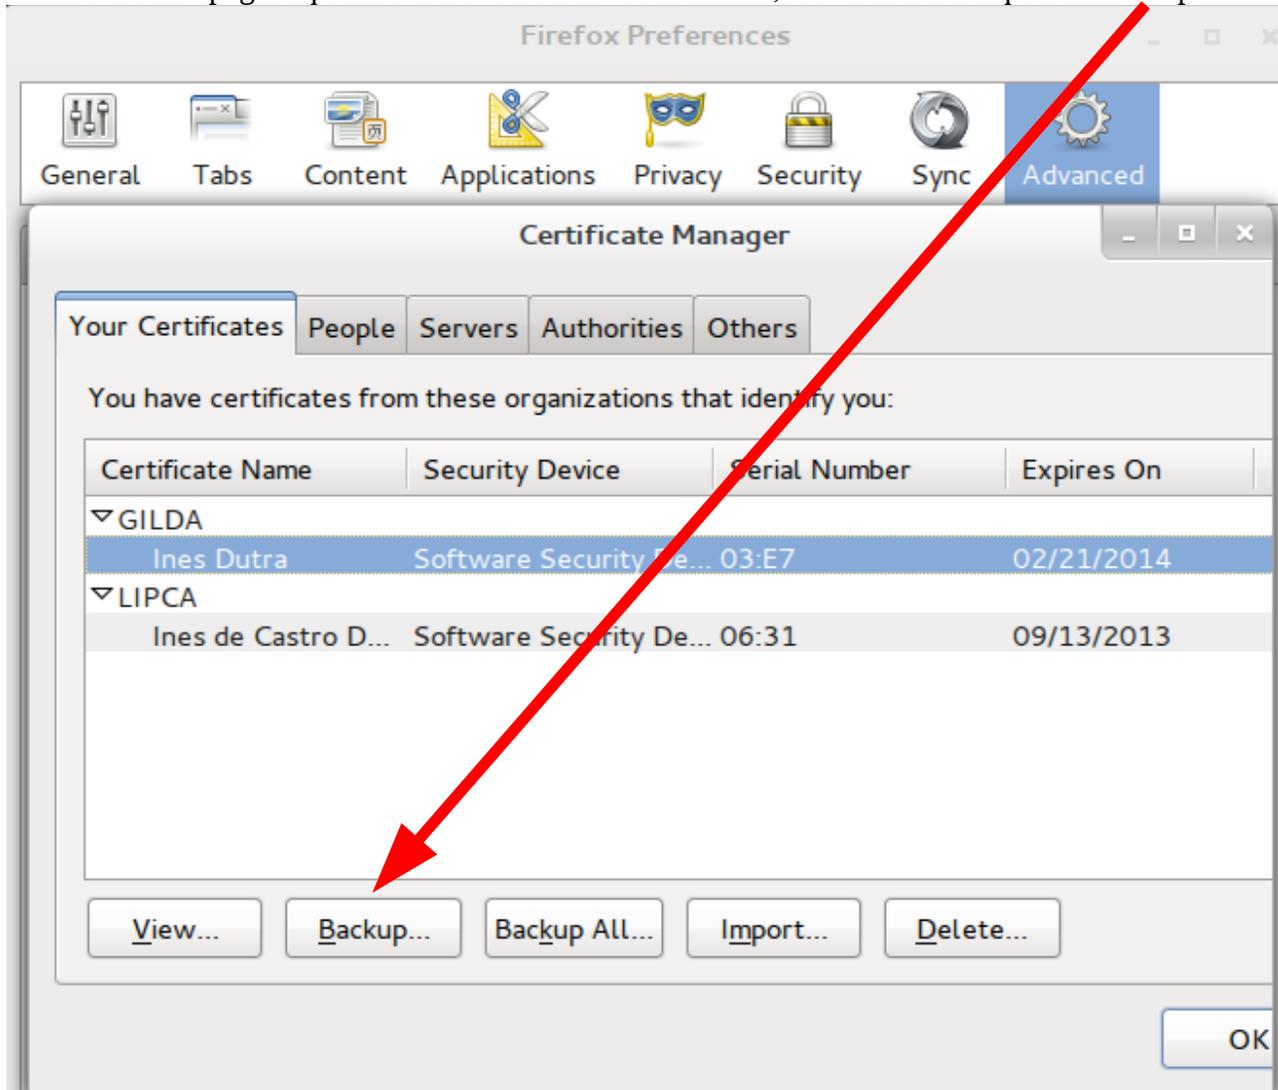

Siga as instruções da mensagem, com exceção do item (3) (suporte não está a funcionar no momento)

Não esqueça de solicitar uma conta para acesso à infraestrutura, portanto siga o último passo de solicitação de uma conta na GILDA User Interface (glite-tutor.ct.infn.it), que será a sua máquina de entrada na grid (<https://gilda-security.ct.infn.it/CA/mgt/restricted/account.php>)

Para solicitar a criação de uma conta, o sistema vai lhe pedir para fazer upload do certificado. Este upload é da sua chave PÚBLICA! Nunca envie a sua chave privada. Veja abaixo como encontrar a sua chave pública.

5. Fazendo o download do certificado

Quando clica no primeiro link da mensagem que vai receber (alguma coisa do tipo: <https://gilda-security.ct.infn.it/cgi-bin/gucert.pl?03E7>), parece que nada acontece, porém o seu certificado fica instalado no browser (se estiver usando mozilla-firefox, pode consultá-lo através de Edit --> Preferences --> Advanced --> View Certificates --> Your certificates). Quando estiver na página que mostra o seu certificado **GILDA**, selecione-o e clique em Backup.

O sistema vai lhe pedir o nome de um ficheiro para guardar o certificado em formato PKCS12. Dê um nome ao seu certificado e grave em qualquer directorio.

Este ficheiro PKCS12 inclui as suas duas chaves: a chave privada e a chave pública.

Para separar estas duas chaves em ficheiros diferentes, precisa utilizar o comando openssl e gerar ficheiros em formato .pem. Os comandos seguem abaixo:

```
openssl pkcs12 -in <yourCert>.p12 -clcerts -nokeys -out usercert.pem
openssl pkcs12 -in <yourCert>.p12 -nocerts -out userkey.pem
chmod 400 userkey.pem
```

A sua chave PÚBLICA é o ficheiro usercert.pem.

A sua chave PRIVADA é p ficheiro userkey.pem.
