

# Plataformas de computação paralela e distribuída

- Execução eficiente de aplicações intensivas em dados ou computação
- Tipos de ambientes:
  - HPC (High Performance Computing)
  - HTC (High Throughput Computing)
- Exs de apps HPC: meteorologia, processamento matemático em geral
- Exs de apps HTC: HEP, bioinformática, finanças etc.

# Tipos de plataformas

## Tipos de Plataformas de Computación

NQE

### Alternativas Centralizadas

IBM sp2,  
SGI Origin 2000  
Beowulf clusters

More:  
•Instruments  
•BDs

Servidores SMP

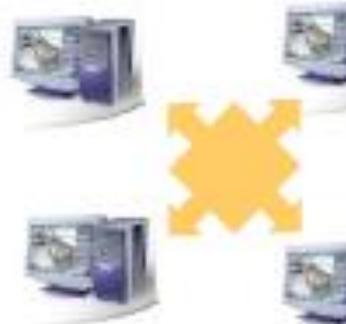

High speed networks  
Servidores MPP

### Alternativas Distribuidas

PBS

Clusters dedicados

Condor

Clusters no dedicados

# Primeiro pequeno trabalho

- Pesquisa breve sobre RMS (Resource Management Systems)
- Baixar e instalar na sua máquina um gerenciador de recursos (e.g. condor, openpbs, sge)
- Submeter alguns programas sequenciais
- Submeter algum programa que utilize MPI
- **Apresentação: 26 de Fevereiro**

# History and Evolution of Grids

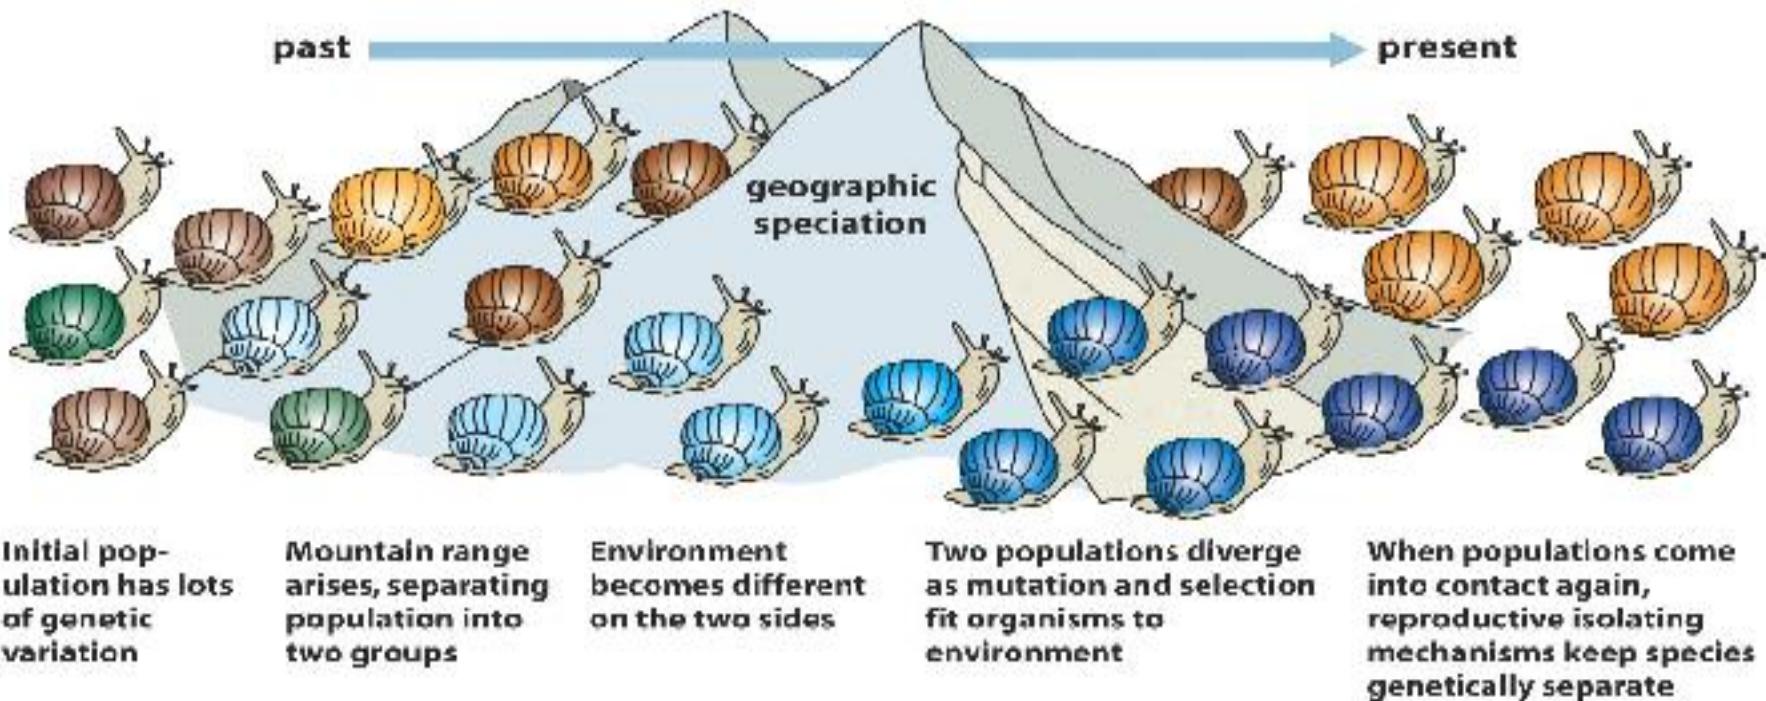

Figure 5-14 Biology Today, 3/e (© 2001 Garland Science)

# History and Evolution of Grid

- Early to mid 90s: numerous research projects on distributed computing
- 1992 (Smarr and Catlett): metasystem
  - a transparent network that will increase the computational and information resources available to an application
- 1993, Legion (Univ of Virginia)
  - Commercial system became AVAKI Sep 2001

# History and Evolution of Grid

- 1995, I-Way
  - IEEE/ACM 1995 Super Computing (San Diego), 11 high speed networks used to connect 17 sites to create one super **meta-computer**
  - Foster, Nature, 12/2002
- 1996, Globus project started (ANL & USC)
  - Followed I-Way
- 1997, Unicore (Germany)

# History and Evolution of Grid

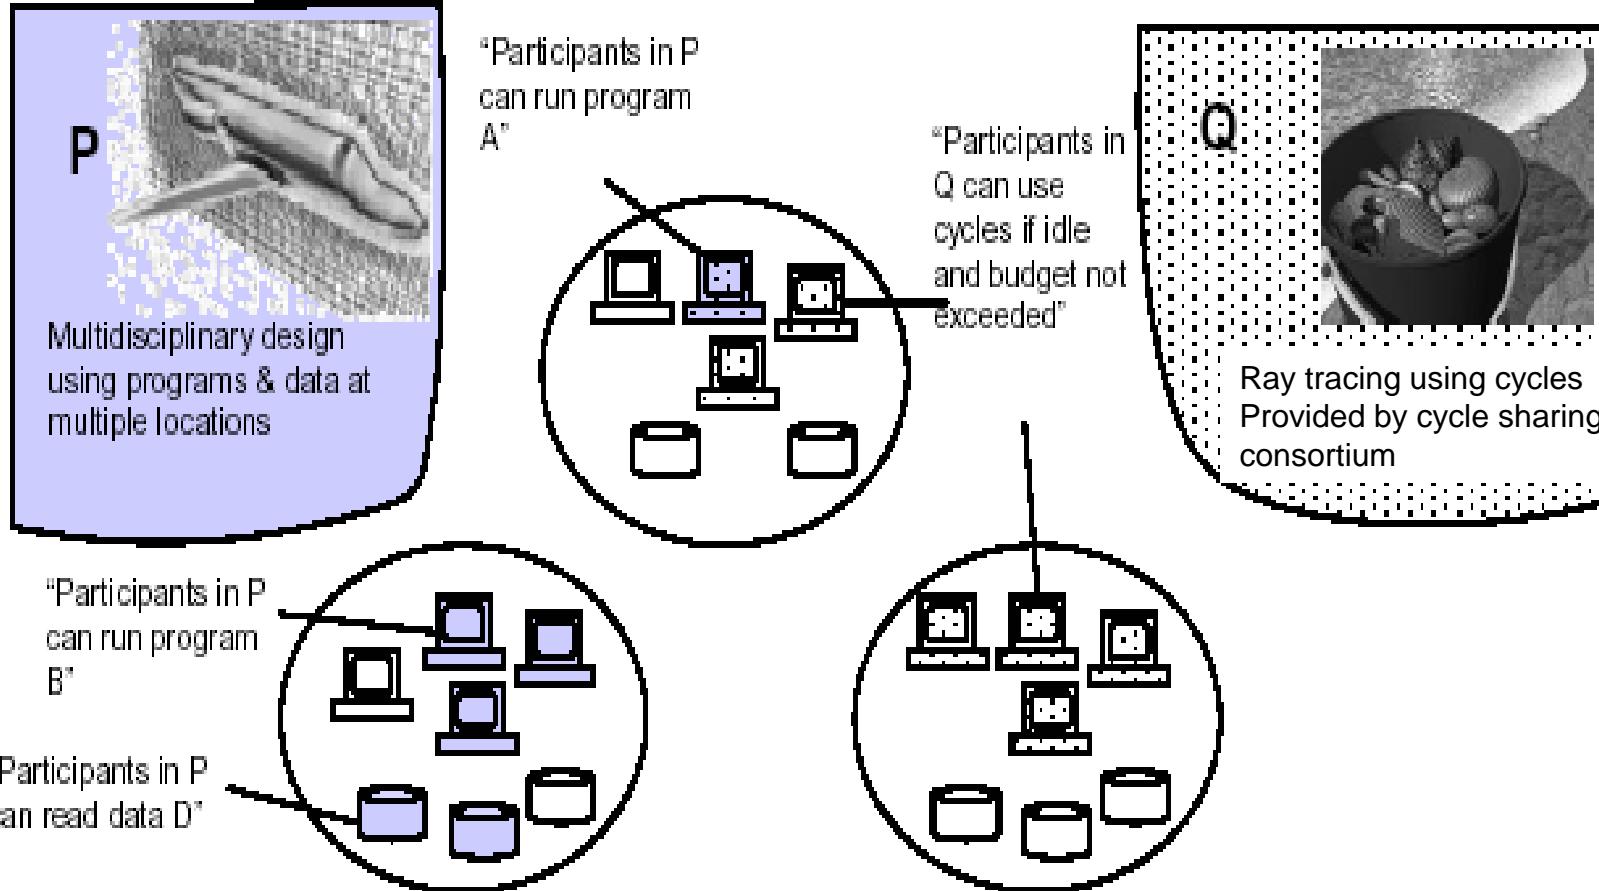

- 2002, Open Grid Services Architecture (OGSA) was first announced during the Grid Global Forum (now Open Grid Forum)
- July 2003: first release of the Globus Toolkit using a service-oriented approach based on OGSA
  - Open Grid Service Infrastructure (OGSI)
- Jan 2004: WS-Resource Framework (WS-RF)
- April 2005: Globus Toolkit version 4

# History and Evolution of Grid

- 2000-2006: The Grid Global Forum
- 2006-: Open Grid Forum

# History and Evolution of Grid

## The Emergence of Virtual Organisations (VO)

Source: "The Anatomy of the Grid", Foster, Kesselman, Tuecke, 2001

# History and Evolution of Grid

## The Emergence of Virtual Organisations (VO)

“A **virtual organization** (or company) is one whose members are geographically apart, usually working by computer e-mail and groupware while appearing to others to be a **single, unified organization with a real physical location.**”

(source: [whatis.com](http://whatis.com))

# History and Evolution of Grid

## The Emergence of Virtual Organisations (VO)

- Sharing resources:
  - The degree of service availability – which resources will be shared
  - The authorization of the shared resource – who will be permitted
  - The type of the relationship - Peer to peer
  - A mechanism to understand the nature of the relationship
  - The possible ways the resource will be used (memory, computing power, etc.)
