

Instructions for the Presentations

May 14th, 2020

You should hand in two documents:

- slides of your presentation (for a 20-min time frame I would suggest not more than 15 slides)
- brief report: 4-6 pages with the contents described below
 1. List of definitions for the main concepts found in the paper(s)
 2. What is the paper(s) about? Could you summarise its (their) contribution in a paragraph?
 3. How does this work differ from others mentioned in the paper(s)?
 4. Do the authors present experiments? What is the methodology used? Does it sound correct? Why?
 5. What are the main results/findings/conclusions? Are the results useful/relevant? Why?
 6. Do you have any criticism to the work? Any suggestions for improvement?
